Introduction

Hi , My Name is Helmi. I'm Web developer , free and open surce enthusiast. Mostly all the time i use linux for working and windows for gaming only. I'd like to consider my self as fast learner and good at tracing bug/error in code. I'm not very good at teaching but i try as often as possible to help in coder communities solving or answer their problem as far as i know. I try to keep learning something new everyday for the better me

Work Experience

Project: ERP-finance (faasri)   2024 – 2025

This project is from PT Faasri handled by gravicode. I was assigned in some of their project developing erp finance app. This project uses tech stacks like .net (webapi + blazor) , ms-sql database, redis,etc.

Project: Rea Kaltim   Mid year 2023 – 2024

This application is a digital system for managing employee data on their other platforms like Azure-AD etc. in this project i was assigned as Frontend Developer (angular)

Project : Komodo Membership by OTAQU   2022 – 2023

This application is all about organizing traveling event on Komodo Island. in this project i was assigned as Fullstack Developer (laravel) . somehow this project was stopped at the beginning of the year 2023

Project : Traveli   2020 – 2023

Traveling app for multiple agents and their affiliates almost similar to previous project in electra but different business flow logic. in this project i was assigned as Frontend Developer (react , backoffice / cms) and support team in frontoffice (nextjs , FE)

Project : Electra by SABRE (A subsidiary of Garuda)   2019 –

Traveling app for multiple agents and their affiliates. in this project i was assigned as Frontend Developer (react , backoffice / cms) and support team in frontoffice (nextjs , FE)

Startup : Shipper.id   2018 –

Shipper is Logistics Aggregator. in this project i was assigned as Fullstack Developer (native php cli execute by cronjob , code igniter , wordpress plugin)

Project : PetTopPia   2018 –

System intended for pet lovers community. managing memberships , event activities etc . somehow this project was stopped. in this project i was assigned as Fullstack developer (laravel)
